Projects

● Samsung Website

I made this website as a clone of original Samsung website for testing my front-end skills

● Quote Generator

I made this website to check my js logic building and practising fetching APIs. This website generate quotes each time we refresh it or press button.

● Tourism Website

It is my one of the first website that I created to practise Front-end skills and it was totally based on my own personal idea about design and theme .

● Macdonal's website

I made this website as a clone of Maldonado s website for practising my skills and fun

● Flappy bird

I also make some games for fun to learn new thing and by this project I learn about canvas in HTML 5 and some new things about js

● Snake game

This project was based on old snake game and I was made on HTML

5 canvas features

● 4 to 2 Priority encoder

This was my class projects was made to check what we learn from our daily hardware class.

● Variable DC power supply

This was my class projects that was based on concepts of circuits analysis .
