ABOUT ME

I am a dedicated **MERN Stack Developer** skilled in building full-stack web applications using **MongoDB, Express.js, React, and Node.js**. I specialize in creating responsive, scalable, and user-friendly solutions, with experience in frontend animations (GSAP, Framer Motion) and backend integrations (Firebase, REST APIs, Socket.io). Passionate about problem-solving and clean code, I enjoy working on both individual projects and team collaborations, constantly learning and improving to deliver impactful digital experiences.

EDUCATION AND TRAINING

Bachelor of Science in Computer Science , Certified MERN Stack Developer , Frontend Web Development Certification , Full-Stack JavaScript (MERN) Course

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Framer Motion, GSAP / Backend: Node.js, Express.js, REST APIs, Socket.io / Database: MongoDB, Firebase Realtime Database / Version Control & Tools: Git, GitHub, npm, Postman / Responsive Web Design, Problem-Solving, Team Collaboration

PROJECTS

Skill Creatives Website (MERN Stack)
Write here the description...Built a full-stack website for a software house to showcase their services, projects, blogs, and contact information. Developed an **admin panel** to manage content, services, and portfolio dynamically. Implemented a responsive and visually engaging interface using **React, Tailwind CSS, Node.js, Express, and MongoDB**.

[Current]
Real-Time Chat Application (MERN Stack + Socket.io)
Developed a one-to-one real-time chat application allowing users to send and receive messages instantly. Implemented online presence tracking, user authentication, and message storage. Utilized **React for frontend, Node.js & Express for backend, MongoDB for data storage, and Socket.io for real-time communication**.Write here the description...

Blogging web (MERN Stack)
I developed a full-stack blogging website where users can create accounts, write and publish blogs, and interact with content. Implemented an **admin panel** for managing users, posts, and site content efficiently. Utilized **MongoDB, Express, React** and **Node.js** for secure and real-time operations.

Cara Web – E-Commerce Website
Built a responsive e-commerce website using **HTML, CSS, and JavaScript**, allowing users to browse products, add items to the cart, and view product details. Focused on creating a **user-friendly interface** with smooth interactions and modern design.

Link: https://itzmk678.github.io/ecommerce-web/

Tourism Web (HTML , CSS & Js)
Built a responsive tourism website using **HTML, CSS, and JavaScript**, allowing users to see different packages of different places. Focused on creating a **user-friendly interface** with smooth interactions and modern design.

Link: https://itzmk678.github.io/tourist/

Samsung Clone (HTML , CSS & Js)
Built a responsive Samsung company website using **HTML, CSS, and JavaScript**, just for practicing purpose and improving front end skills .

Motivated MERN Stack Developer eager to create efficient, responsive, and user-friendly web applications while continuously improving technical skills.
